

Install the SIMMS Web Browser Program

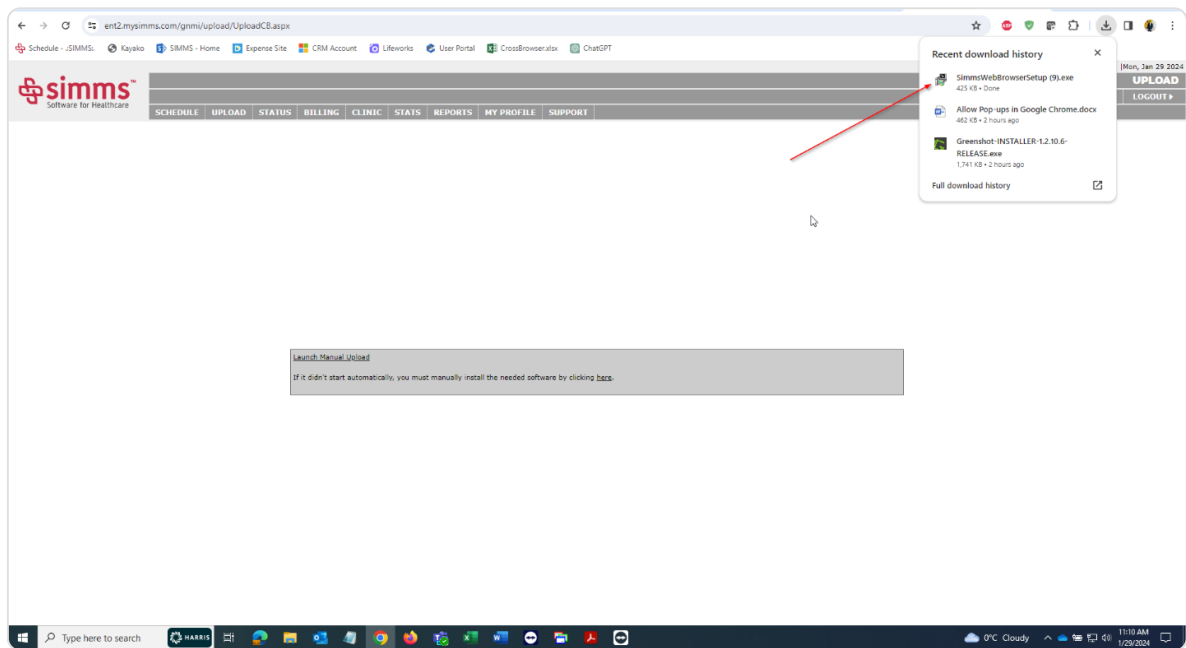

BEFORE YOU BEGIN Make sure pop-ups are allowed in Google Chrome first. This is covered in the **First Time Login** guide — if you haven't done this yet or aren't sure how, check that guide before starting this installation.

- 1 Log in to SIMMS and go to **Upload Files** under **UPLOAD**. Click the link where the arrow is pointed in the screenshot below (the hyperlink displayed with the text "here").

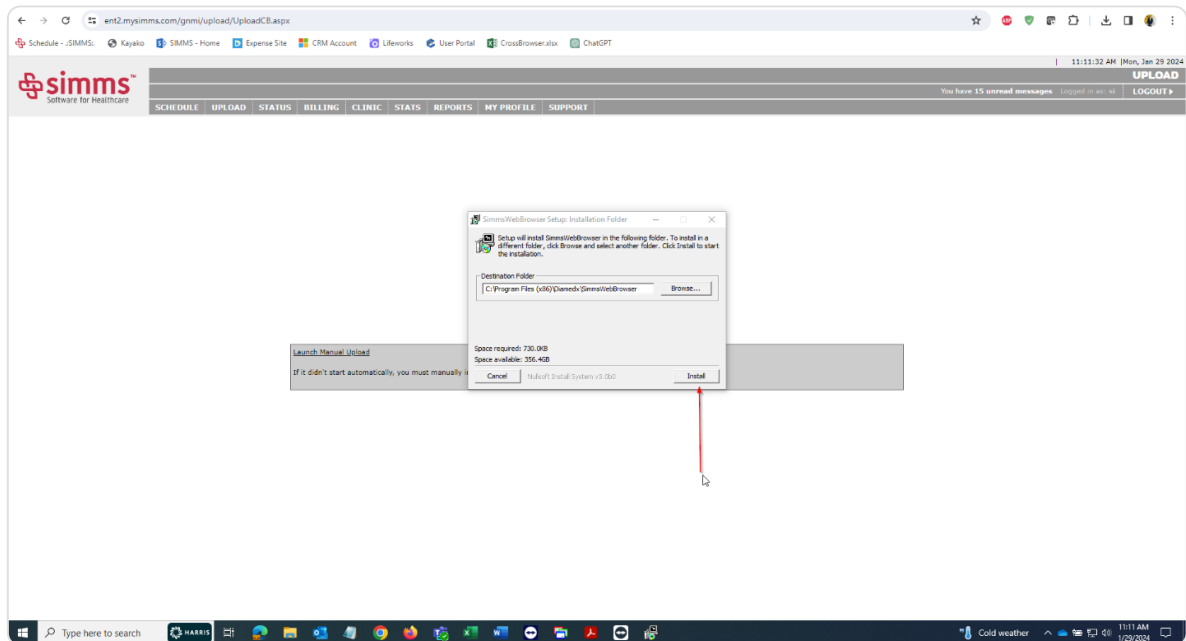

2

A file will be downloaded. Click the downloaded file to open it.

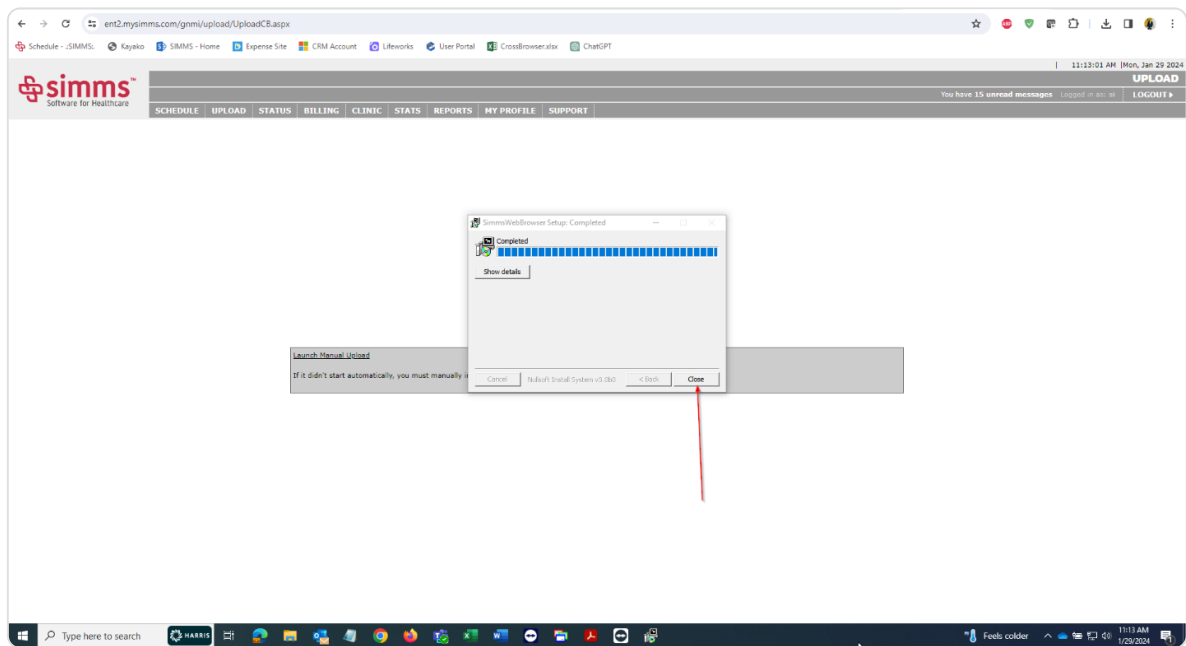

3

Click **Install**.

4

Once the installation is complete, click **Close**.

5

Refresh the page. Tick the **Always allow** checkbox, then click **Open SimmsWebBrowser**.
